

A feature packed computerised sewing machine with easy to use touch button controls and back lit LCD screen.

- 294 Stitches
- Automatic thread trimming
- Advanced needle threading system
- Knee Lift
- Includes wide table and other quilting accessories

Create your own style, create your own fashion with the innov-is 400

Be sure of the best stitch every time

The **innov-is 400** will revolutionise the way you sew. Enjoy applying any one of a huge range of built-in stitches, including a variety of utility stitches from blind hems to advanced decorative patterns.

Choose from 294 utility and decorative stitches including 10 buttonholes and 3 fonts.

Easy to use functions

Just choose the function you want from the control panel, press the button and you're ready to sew.

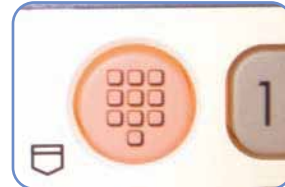

Direct stitch selection

Simply key in the number of the pre-programmed stitch you would like to use.

My favourite stitch

A handy function that allows you to store your favourite stitches, giving you one touch access to those most frequently used.

My Custom Stitch™

This unique feature allows you to design your own decorative stitches on the LCD display panel and save them to memory, to use whenever you wish. Extremely handy for quilting and similar design projects.

Customised settings

Allows you to adjust the stitch width and length to your personal preference. Customised settings can be saved to memory to use again in future.

Programmed thread trimming

The automatic thread trimming cuts both upper and lower threads at the end of each sewing task.

Error messages

These alert the user to oversights. For example, if the buttonhole lever has not been lowered, a sound and display message will notify you.

Speed control customised for zigzag width

The slide control can be set from slow to fast to ensure you always sew with accuracy, particularly on intricate detail or curves. It can also be programmed to alter the stitch width.

F.A.S.T. bobbin winding system

Just wind the thread around the bobbin, pass it through the guide slot and press start. It's bobbin winding made easy.

Wide table

Advanced needle threading system

With the **Innov-is 400's** advanced in-built system, threading the needle is effortless.

Presser-foot pressure adjustment

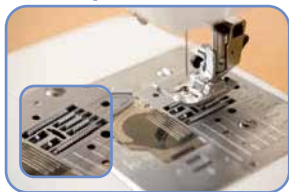

Helps you stitch pucker-free seams on even the stretchiest of knits. Simply adjust the pressure applied by the presser foot.

Presser-foot levelling button

Keeps the presser foot level for smooth, consistent stitching over changing fabric thickness, such as the start of a seam or crossing seams.

Seven-point feed

With extra teeth for smoother feeding, it gives superior stitch quality, smooth, pinpoint seams on any weight of fabric, from sheer silk to corduroy and denim.

Accessory compartment

This space comfortably holds all the included accessories.

Quick set bobbin

Just drop in a full bobbin, thread in the direction of the arrow, and you're ready to sew. Nothing could be simpler.

The extra width of the **Innov-is 400** helps make light work of large items and with the included wide table it's easier than ever to handle large projects such as quilts and bed linen.

Stitch reference Panel

The **Innov-is 400** is supplied with a detachable stitch reference panel. So you can easily find the number of the stitch you want to use.

Quilting Extras

Sewing or quilting work is more versatile and neat with accessories that include a Quilting Foot and Walking Foot.

Knee lift

Free up your hands by using your knee to lift the presser foot. Ideal for working on large projects such as quilts.

294 stitches

The built-in stitch selection is perfect for enhancing the sewing of everything from clothing to home décor.

Innov-is 400
